Leadership in the Era of the New Energy Mix
Monday, 23 March 2020 | 0830-1730 hours

The Next Wave programme is tailored for energy professional under the age of 36 or with less than 10 years working experience in the energy industry.

This programme offers participants the opportunity to network with seasoned professionals, learn about pressing challenges and opportunities in the industry, and receive guidance on how to make the most of their careers.

150+ participants
30+ organisations
10+ countries
20+ speakers
9 hours of networking

Tickets are USD 50 each and include breakfast, lunch and a networking reception

Sponsored by ExxonMobil
Leadership in the Era of the New Energy Mix

Energy is a vital element in our life. Not only is it an enabler for economic development, it improves living standards and fuels growth as well. With the expanding population and world economy, the global energy demand is expected to increase. This will require us to provide not just energy, but also cleaner energy as we transition to a world with a lower carbon footprint. The adoption of the “Sustainable Development Goals (SDG)” and “The Paris Agreement” on Climate Change are two ground-breaking world-agreements aimed at setting a new direction for an energy revolution across the globe. Energy is key to sustaining development, while sustainable development requires sustainable energy. Sustainable development is development that meets the needs of the present without compromising future generations to meet their needs. And this requires a cleaner and more efficient energy mix today.

An increasing number of International Oil Companies (IOCs) are taking initiatives to collaborate with local authorities in diversifying their businesses in new or alternative energy. The driving force for the industry to rethink its strategies is not just from the low oil price in recent years, but also due to rising global demand for cleaner energy. As the industry aspires to deliver sustainable energy, what are the challenges the industry must overcome? How can current and future energy leaders reinvent the industry framework to provide solutions and move beyond the current boundaries to accommodate increasing energy demand?

In the process of achieving energy efficiency, the pursuit of technological innovations (i.e. digitalisation, artificial intelligence, etc.) have also led to new opportunities. As the energy industry transforms, professionals at all levels are expected to advance and position themselves in the new business framework. How do Young Professionals (YPs) maximise their potential in this changing energy landscape and embrace these new opportunities? What is the roadmap to ensure a successful career in the energy industry?

The Next Wave program at OTC Asia 2020 invites Young Professionals to learn more about the way forward of the energy industry. The keynote and panel sessions will provide an enriching platform for participants to engage in industry and career related discussions with seasoned energy leaders, as well as exchange ideas with like-minded peers.

Programme

0830-0900 hours  Registration & Welcome Coffee
0900-0915 hours  Welcome & Introduction
0915-1000 hours  Keynote
1000-1030 hours  Coffee Break & Group Photo
1030-1230 hours  Panel Session
1230-1400 hours  Luncheon
1400-1630 hours  Roundtable Breakout Session
1630-1640 hours  Closing Remarks
1640-1730 hours  Networking Reception

This brochure is updated as at 1 February 2020
Keynote

0915-1000 hours

Panel Session

1030-1230 hours

Panellists will discuss what the “New Energy Mix” means for young professionals

Roundtable Breakout Session

1400-1630 hours

The roundtable breakout session provides attendees personal opportunity to discuss their own career development regarding the topic addressed by the keynote speaker and panellists, and offers time to consider how they can position themselves around these future industry challenges. These breakouts encourage participation and interactive sharing between attendees and topic facilitators.

Topics to be covered in the session include:
- Business Trends
- Career & Personal Development
- New Energy
- Talent Management
- Technology

Topic Facilitators:

Ahmad Hatta Kanaruzzaman
Managing Director Malaysia / Brunei
Aker Solutions

Maria Sternuzza
Senior Vice President
Asia Pacific
Baker Hughes Company

Stefanie Khaw Sui Lynn
Principal
Boston Consulting Group

Jeff Lehrmann
Managing Director
Chevron South Asia
The Next Wave Committee

Chair
Ching Siu Jeen
Petrophysicist
Downunder Geosolutions

Vice Chair
Kenneth Yip
Sourcing Manager
Sarawak Shell Berhad

Advisor
Alex Holli
Consultant Engineer
FM Global

Members
• Amelia Karim, ExxonMobil E&P Malaysia
• Hanna Razif, Intertek
• Arun Krishnan, MODEC Offshore Production Systems
• Jack Gomes, Noble Corporation
• Nabila Farhana Bt Zainal Abidin, PETRONAS
• Mohamad Hazwan Hafiz Bin Mohamed Razi, PETRONAS
• Abdul Hadi bin Zainee, PETRONAS
• Chanapol Lim sakul, PTTEP
• Wiwit Sumritawatchasai, PTTEP
• Tee Siau Inn, Sarawak Shell Berhad
• Siti Fatimah Abdul Aziz, Schlumberger
• John Lee Yung, SMS Sand Management Services
• Fikri Irawan, Weatherford
• Alahdal A. Hussein, Well Expert Services
• Drennan Goodall, Woodside Energy
